Accounting for last layer FLOPs (attention)
a = 0.844 (0.81, 0.88)
$N^\star(5.76e23) = 3T$ (2T, 6T)
a
Accounting for last layer FLOPs (attention)
a = 0.708 (0.67, 0.73)
$N^\star(5.76e23) = 790B$ (478B, 1T)
b
Correcting warmup (attention)
a = 0.597 (0.57, 0.62)
$N^\star(5.76e23) = 265B$ (176B, 360B)
c
Optimizer tuning (attention)
a = 0.497 (0.48, 0.52)
$N^\star(5.76e23) = 76B$ (57B, 105B)
e
Cosine decay (attention)
a = 0.577 (0.55, 0.61)
$N^\star(5.76e23) = 197B$ (130B, 317B)
d
$N^\star(C)$
